

I drive in my vehicle all day, every day. It is important that I know what the road conditions and weather is at all times. XM radio has been instrumental in keeping me abreast of hazardous and crowded road conditions. I ask that you not support HR 4026. We would like to keep our choice on who we listen. This nation is getting to the point that only certain people have rights. We want to express that we have the right to listen to whomever and whatever we would like. Keep XM free for their listeners.
